WORKING WITH ADULTS IN GROUPS: INTEGRATING COGNITIVE-BEHAVIORAL AND SMALL GROUP STRATEGIES. Sheldon D. Rose. The Jossey-Bass Social and Behavioral Science Series. Jossey-Bass Publishers. © 1989.

[In this book, the author presents an effective step-by-step approach for working with adults in groups to solve a wide range of problems—from poor communication and everyday family difficulties to depression, phobias, and drinking problems. The author combines cognitive-behavioral theory and practices with small group strategies to create a multi-method approach to group therapy—one that can be used by social workers, psychologists, counselors, and other helping professionals in a range of settings to improve assessment, enhance treatment, and increase the coping skills of clients in groups. This approach skillfully integrates concepts and interventions from traditional social group work, cognitive-behavioral psychotherapy, and other interactive group methods. Unlike some other group work books, this one includes material on group and individual interventions.]

## SHORT BOOK REVIEW

### A Book With Many Awards

THE BROKEN CORD. Michael Dorris. Harper Perennial, A Division of HarperCollins Publishers. ©1989.

[Called a "non-fiction masterpiece" by one reviewer, this book is the true story of a father's raising an adopted American Indian child who has FAS-Fetal Alcohol Syndrome. He gives the child the name of Adam. An Indian himself, an anthropologist, and a single parent at first, Michael chronicles the deeply moving tale of his search for answers to his son's problems. Part memoir, part mystery, part love story, polemic, and social and public health story, the book is transcendent in that it focuses attention to all children with special needs. The book received numerous awards at the time of its publication and since, including the National Book Critics Circle Award.]
